

Jonathan Litardo's CV

Jonathan Litardo

Cybersecurity Student | Data Science Certificate | CompTIA Security+
lit23005@byui.edu | LinkedIn | GitHub

Currently

Pursuing a B.S. in Cybersecurity with a Data Science Certificate at Brigham Young University-Idaho.

Specialized in

Incident response, threat detection, network monitoring, vulnerability assessment, risk analysis, log correlation

Interests

Capture the Flag (CTF) competitions, cloud security architecture, open-source security tooling

Education

March 2027 (expected) **Brigham Young University - Idaho**, Rexburg, ID

- Bachelor of Science in Cybersecurity, Minor in IT Fundamentals, Data Science Certificate
- Relevant Coursework: Network Security Analysis, Incident Response, Threat Intelligence, Security Operations, Security Platform

March 2021 **Jose Domingo de Santistevan Technical High School**, Guayaquil, Ecuador

- Technical Diploma, focus in Object-Oriented Programming, Network Infrastructure, Virtualization

Certifications

July 2025 CompTIA Security+ (SY0-701)

Coursework

April 2025 - June 2025 **CYBER301 Network Security Lab**, Brigham Young University - Idaho

- Reduced false positive rate by 40% in network threat classification by analyzing 1,000+ daily packets in Wireshark and building custom detection signatures
- Conducted vulnerability assessments using Kali Linux penetration testing tools to identify critical security weaknesses across simulated enterprise networks
- Contained and documented 15+ simulated breach scenarios by executing NIST-aligned incident response playbooks including containment, eradication, and lessons-learned reporting
- Developed custom detection queries and generated detailed technical reports documenting threat patterns and remediation recommendations
- Collaborated with team members to correlate security logs and identify attack vectors in multi-stage breach scenarios

Experience

April 2025 - Present **Plumber Assistant**, BYU-Idaho Mechanical Operations, Rexburg, ID

- Resolved 5-10 weekly maintenance requests with a 95%+ on-time completion rate by triaging urgency and coordinating cross-building schedules
- Performed 8+ critical installations including toilets and faucets in student housing, ensuring compliance with plumbing codes and safety standards
- Eliminated preventable water damage events by implementing proactive inspection checklists for 10+ building systems, reducing emergency callouts

April 2024 - December 2025 **Custodial Technician**, BYU-Idaho Facilities Services, Rexburg, ID

- Maintained service continuity across 5+ facilities during off-peak shifts by independently managing workload without direct supervision, meeting 100% of scheduled deadlines

- Cut supply retrieval time by reorganizing inventory systems across multiple shifts, improving coordination between 10+ team members

Technical Skills

- **Security Operations:** Incident Response, Threat Detection, Network Monitoring, Vulnerability Assessment, Risk Analysis, Log Correlation
- **Security Platforms:** Wireshark, Nmap, Kali Linux, SIEM Tools, Active Directory, Endpoint Security
- **Technical Proficiencies:** Linux Command Line, Virtual Machines, Docker, GitHub Actions CI/CD, AWS EC2
- **Programming:** Python, JavaScript, SQL, HTML/CSS, React, PowerShell (basic), Bash, C++
- **Security Frameworks:** NIST Cybersecurity Framework, Defense in Depth, CIA Triad, OWASP Top 10

Additional Information

- Languages: English (Fluent), Spanish (Native)
- Active participant in Capture The Flag (CTF) competitions, studying cloud security architectures, and contributing to open-source security tool development
